Introduction

Our ducts and fittings are specially designed for low and medium-pressure indoor HVAC applications. Our factory do pre-fabricated air ducts and fittings made with very high quality of galvanized steel sheets thickness of 0.6mm, 0.63mm, 0.8mm, 1.0mm and 1.2mm.

These prefabricated ducts are manufactured with variant sizes of requirements, Also the ducts are additionally braced with galvanized baffle tubes as per the SMACNA standard.

Products

Manufacturing of our ducts & Accessories should meet the customer requirements and standards.

Improving our capability to maintain the eco-friendly & energy efficient designing of ventilation & Air conditioning ducts to the comfort and industrial segments.

Always deliver the products by making a proper schedule & follow the same without compromising of quality.

Our Ducts

Factory Facility
Sophisticated
~5000Sq.Ft for
both production &
storage Capacity

Automation
PLC programmed
automation used
for production to
achieve quality.

Production Capability
With the support of
trained in-house well
equipped design Team,
we can produce
Box type – 300Sqm
'L' Type – 650Sqm per
shift.

Raw Materials
Class-I GI Ducts
with 120GSM
Approved & Tested
